

# CAIS 117: Intro to Programming with Python

Spring 2024

---

## In-class Activity 03: Documentation

Activity is DUE as indicated on the course schedule. This is a **group assignment**; work with 1-2 classmates.

### Goals:

- Work towards identifying what unfamiliar code does
- Document code

### Part 1

- Open challenge.py from the “Demos” tab on the course website
- This file contains code that is unfamiliar to you
- Work with your partner to trace the code and figure out what it is doing. As you make progress, add documentation to the code.

### Submission

Submit your documented code on Gradescope as a group.
