Intro to Coding with Python– Welcome!

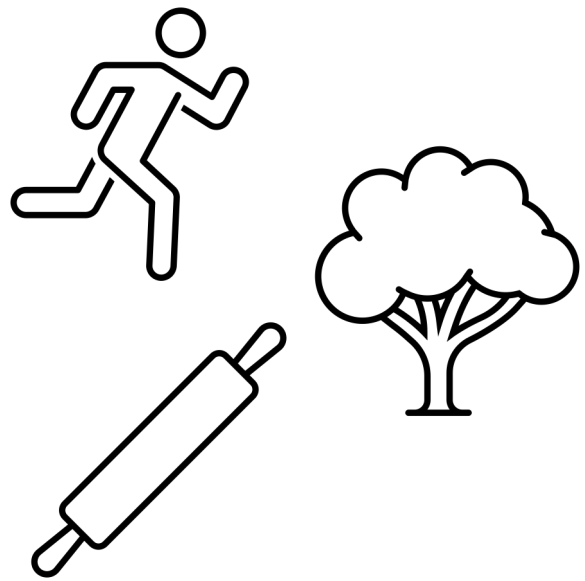
Dr. Ab Mosca (they/them)

Slides based off slides courtesy of Jordan Crouser (https://jcrouser.github.io/)

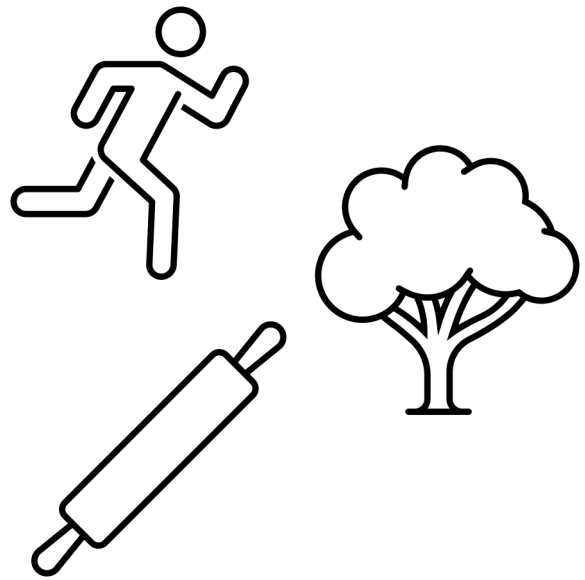
Plan for Today

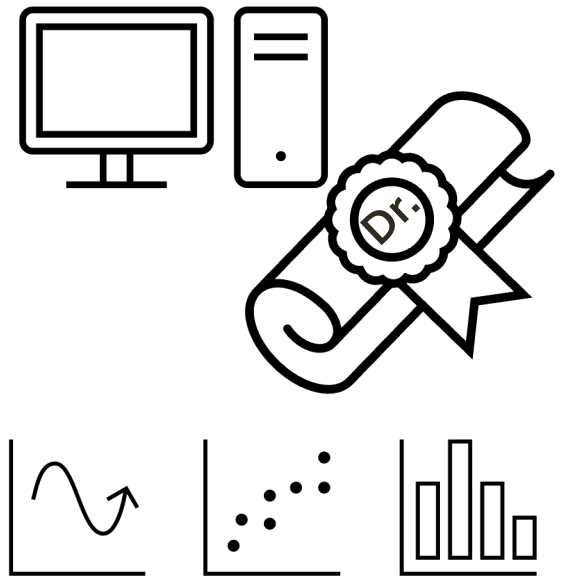
- Who am I?
- Who are you?
- What will we do in this class?
- What is computer science / coding?

Who Am I?

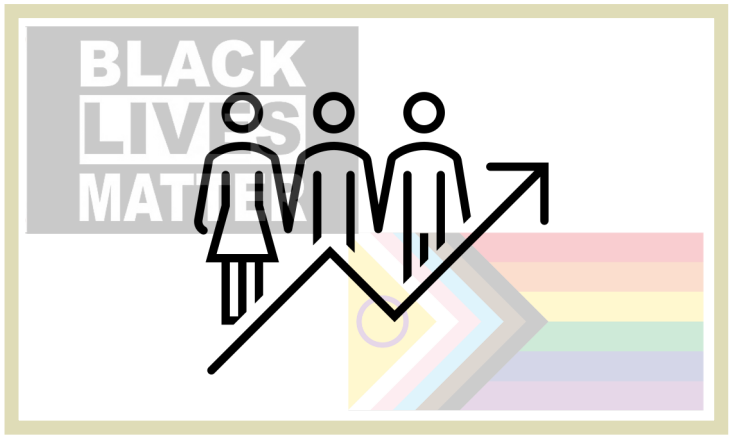


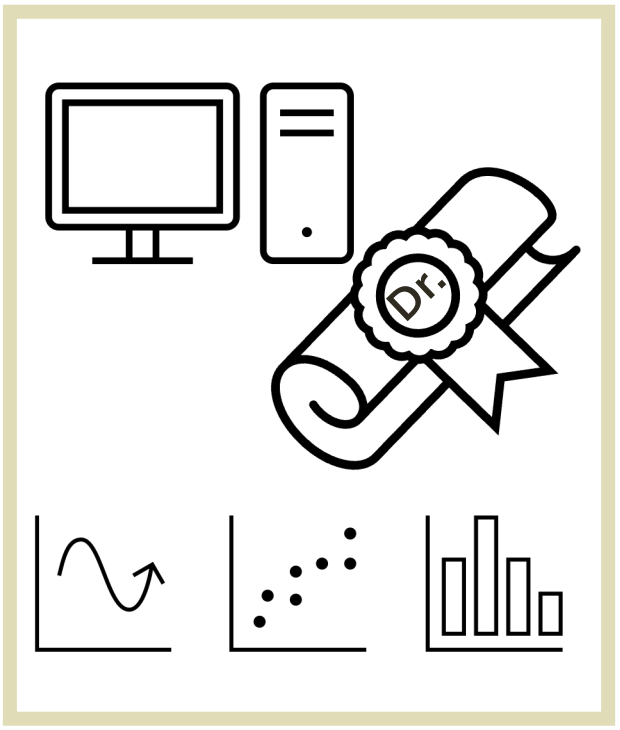
Who Am I?





Who Am I?





Who Are You?

- Form groups of 3
- Introduce yourselves (name, pronouns)
- Share:
  - A highlight of your winter break
- Find 1 thing that your entire group has in common (favorite color? hometown? left-handed? Be creative!)
- After about 5 minutes we will go around, introduce ourselves, and share what each group has in common

Who Are You?

- Form **new groups** of 3 (move around!)
- Introduce yourselves (name, pronouns)
- Share:
  - Would you rather live in a mansion that you can never leave OR live in a camper van and move as often as you want?
- After about 5 minutes we will go around, introduce ourselves, and share our would you rather answers

Who Are You?

- Form **new new groups** of 3 (move around!)
- Introduce yourselves (name, pronouns)
- Share:
  - Would you rather have the ability to teleport OR be able to breath underwater?
- After about 5 minutes we will go around, introduce ourselves, and share our would you rather answers

- Name tags!

What You Will Learn & Logistics

What Is This Class?

- An introduction to coding with the programming language Python assuming no prior knowledge of the subject
- You will learn…
  - How to computationally approach problem solving
  - How to use basic programming constructs
  - How to code in Python
  - How a computer works, at a high level

Important Info

- Course website (**write this down**!): https://amosca01.github.io/CAIS117-S24/

- Office Hours
  - Wilson Hall 325
    - Wednesday 09:30 - 11:00
    - Thursday 14:30 - 16:30
    - By Appointment

Important Info

- Textbook: *Programming in Python 3 with zyLabs*
  - See course website for instructions
- Assignments:
  - Turn in on Gradescope – Demo! (https://help.gradescope.com/article/ccbpppziu9-student-submit-work)
- Due Dates: As listed on course schedule.
  - 24hr grace period; no late submissions
  - Lowest homework dropped
  - See syllabus for revise and resubmit policy

Important Info

Assignments

- Homework
  - Pair assignments
  - Graded on effort and correctness
- Quizzes (on PLATO)
  - Individual assignments
  - Can re-take as many times as wanted before deadline
- In-class Activities
  - Graded on effort
- Final Project
  - Small group
  - Graded on creativity and correctness

Important Info

- I’m here to help you succeed
- Please come to office hours or reach out if you need any additional support

Now the good stuff

What is a Computer?

What is a Computer?

- A “computer” performs computations

Computation (def.)

"a sequence of **well-defined operations** that lead from an initial starting point to a desired final outcome"

mathematical

logical

Original "Computers"

Katherine Johnson

Keypunch operators at IBM in Stockholm in the 1930s.

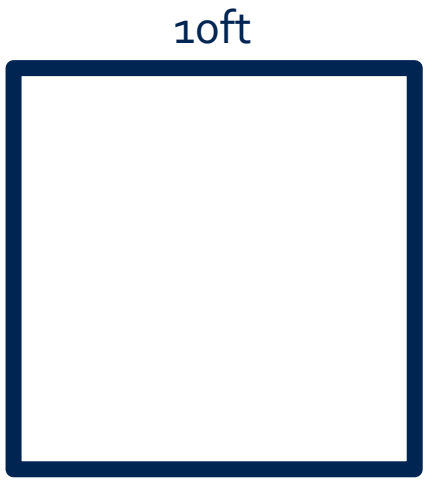
Activity: computational thinking

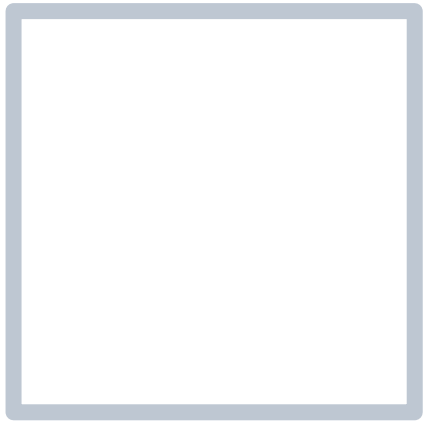
Activity: computational thinking

Activity: computational thinking



Task 1

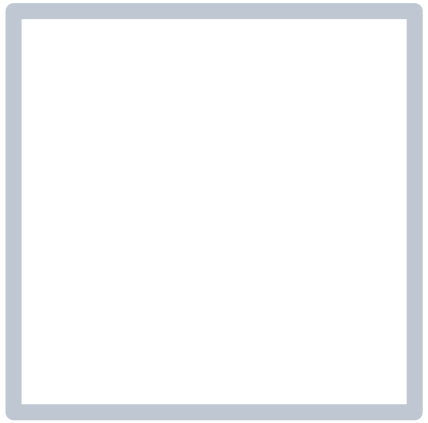
Activity: computational thinking



Task 1

Task 2

Activity: computational thinking



Task 1

Task 2

the 1st letter of your first name

Task 3

Discussion

- What do you notice?
- Were there any letters you couldn’t draw?
- Can you tell in advance which shapes are impossible?

Computer science (def.)

"the **study of computation**"

- **Problems** that can be solved computationally
- **Languages** used to describe computational processes
- **Machines** that carry out those processes
- **Theoretical limits** of computation
- **Computational solutions** to problems in math, science, medicine, business, education, journalism, …
